

K3

Pressing the AMP button on the R7 will bring your K3 Integrated Amplifier out of Standby mode. Selecting the INPUT arrows will allow the user to scroll through the amplifier inputs. The VOLUME down and up arrows (▽ & △) will move the volume control knob in the relevant direction for the desired listening level. If you have used the R7 remote to control another K3 component you will have to press the AMP button again should you wish to return remote functionality to the Integrated Amplifier.

Pressing the BT button will select the Bluetooth source and the blue BT light on the amplifier will flash. When your device has found the amplifier, 'ROKSAN K3' will appear on your device. Next, connect to pair your device. When paired or connected the blue light will stop flashing and remain on. You are now ready to stream music to the K3 from the paired device.

NOTE: If you press and hold the AMP button for two seconds this will put your K3 Integrated Amplifier into Standby mode.

The bottom section of the R7 will control the K3 CD Player functionality (STOP □, PLAY/PAUSE ▷||, and SKIP TRACKS ◀ & ▶). Pressing SHUFFLE will play the tracks on the CD in random mode.

The MUTE button at the bottom right of the R7 will mute the volume. If pressed again it will take the amplifier back out of mute mode.
